TP Automation Hiring Announcement

Process Control and automation veteran, **DJ Lambing** has joined the automation division of Western PA based TPE Industries as a senior automation engineer. DJ comes to us with 20 years of industry experience and a broad skill-set in the areas of process measurement, control and total systems automation.

DJ started his career at Cambria Systems in Sidman, PA where he started out as a controls engineer. In his 15 year tenure at Cambria he was responsible for everything from modifying customers existing control systems to add functionality and improve productivity to designing, implementing and commissioning complex control and automation projects. DJ was also responsible for managing large scale industrial projects including the direction of plant personnel and/or outside contractors.

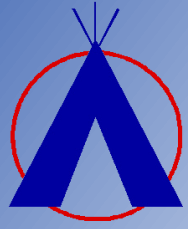

In 2013 DJ left Cambria to embark on a career with the Carnegie Mellon University spinoff/start-up company Aquion Energy in New Stanton, PA. Aquion's goal was to manufacture large-scale energy storage systems. He worked there as a senior controls engineer until Aquion filed for Chapter 11 bankruptcy in March of 2017.

His expertise included providing power and control system design and schematic development for everything from small machines to complete manufacturing facilities. He brings a broad background in the markets of water and wastewater treatment, food processing, coal/material handling and industrial manufacturing.

Founded in 1988 as TP Electric, Inc., TPE Industries has grown steadily each year as the result of working closely with their customers to solve problems and complete work on-time and under budget. The strength at TPE resides in a focused, market-specific approach. TPE brings the same values and hard work to the table every day. Our customers have learned to put their trust in us, regardless of the size of the job.

With three separate divisions focused on industry and application specific needs, TPE has brought industry leadership to their team in previous hires as well as new ones.

Proudly affiliated with the International Brotherhood of Electrical Workers (IBEW), TPE Industries continues to maintain long-standing customer relationships with some of the area's premier companies. In 2004, TP Electric became involved in the Natural Gas and Oil industry. Today TP electric, Inc. is the Natural Gas & Oil Division. TP Electric & Power, LLC is the Industrial and Commercial Division and TP Automation is the process control and automation division of TPE Industries.
